# ACN BROADBAND TECHNICAL FAQ
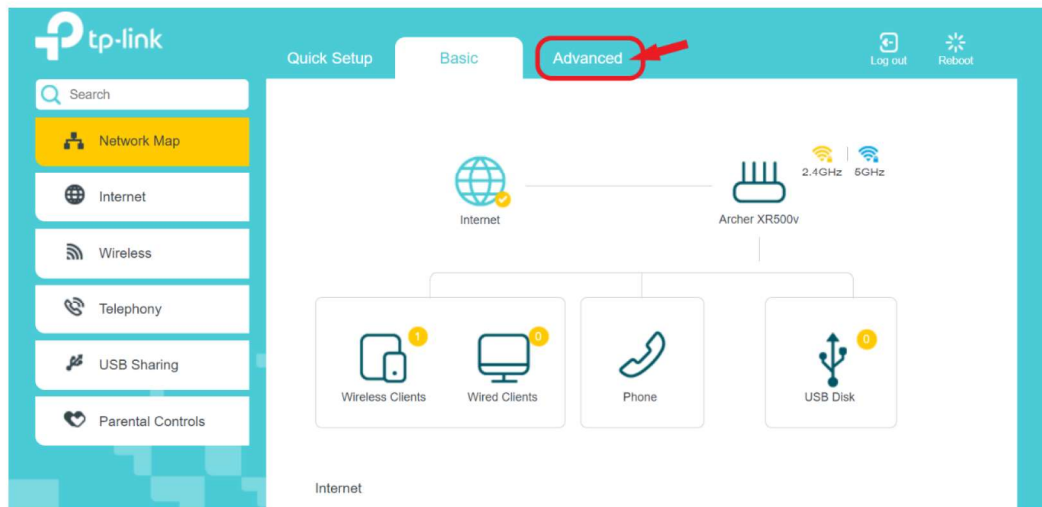

A. **How to change your Wi-Fi password / Wi-Fi Username for Tp-link?**

1. Connect to the Wi-Fi / LAN Cable,

2. Open the web browser (Google chrome / Firefox). Type in the address bar "192.168.1.1".

3. tp-link Router will open.

4. The default Password of the device will be "admin"

5. Then enter Login.

6. Click on "**Advanced**".

7. Click on **Wireless Setting**.

8. To set your Wi-Fi Name click on **SSID** (Service Set Identifier) box.

9. Type your desired Wi-Fi name in the option provided as "**SSID**".

10. Select channel Width as **40MHz/80MHz**

11. To set your Wi-Fi Password, Click on "**Password**"

12. Enter your desired password. In "**Password**" box, your password length has to be between 8 to 64 characters with at-least 1 Uppercase and 1 Special Character.

13. Set your Security as WPA/WPA2 Personal Encryption as "AES".

14. After giving your Wi-Fi name and Password, click on "**Save**", Then Click **Ok,** to save your settings. Please Confirm that the "Disable WLAN Interface / Hide SSID" option is not checked. This will hide your Wi-Fi from all connected devices.

15. Then Logout Successfully.
